

Marco Joint Tape

Product information

Marco Joint Tape is a paper tape specially produced for strong reinforcement of plasterboards and other board joints on walls and ceilings.

The product fulfils the CE requirements according to EN 13963.

Instructions

Apply a first coat of joint filler.

For good adhesion between tape and filler layer, the latter should be at least 0.5 – 1 mm thick.

Place the tape in the wet filler and press firmly by drawing the tool along the joint. The outside of the tape should always face the substrate.

Immediately after this, apply a thin layer of filler to cover the tape.

Once completely dry, apply a second and a third coat. Allow each coat to dry thoroughly before applying the next coat.

The tape is marked every meter for safe identification.

Follow the relevant manufacturer's recommendations for choice of filler.

Storage

In a dry location at normal room temperature

TECHNICAL DATA

Roll length

23 or 76 m

Width

Approx. 50 mm

Packaging

20 rolls per carton

Range of application

For indoor use
