and renovation

A white spray filler for new construction and renovation

Suitable for walls and ceilings indoors

For smoothing and texturing

For the big projects

Nordic Ecolabelled

DALAPRO® AIRLESS SPRAY

Ecolabelled ready-mixed spray filler for new construction and renovation

PRODUCT INFORMATION

Dalapro Airless Spray is a white, Ecolabelled spray filler with a high build on all common types of indoor wall and ceiling surfaces. Fine dolomite marble provides maximum whiteness and build.

The product is suitable for thin smoothing and texturing and fulfills CE marking requirements according to EN 15824 and is manufactured in accordance with ISO 9001 and ISO 14001.

Tools are to be cleaned in water. Large volumes of waste can be deposited as normal refuse at municipal refuse facilities. The plastic in the packaging is recyclable and must therefore be taken to the appropriate recycling point or municipal recycling plant.

INSTRUCTIONS

For spray application on clean, dry and firmly attached surfaces at a minimum temperature of +5°C. The filled surface is sanded when it has dried. Use sandpaper with particle size 150-180. Eye protection and a dust mask are recommended when sanding. Dust off before the next treatment. Filled surfaces should be primed before wallpapering.

CONSUMPTION OF MATERIAL

1 mm thin coat plastering = approx. 1 litre/m².
Spray-texturing = approx. 0.3 litre/m².

DRYING TIME

The drying time is dependent on substrate, layer thickness, temperature, air humidity etc.

STORAGE

Protect from frost and direct sunlight. Filler is perishable and therefore labelled with a date of production. Unopened packs can be stored for 12 months. Visit www.dalapro.com for further information.

TECHNICAL DATA

Binder: Latex co-polymer

Solvent: Water

Filler: White dolomite

Particle size: Max: 0.3 mm

pH: Approx.: 9

Colour: White

Flammability: Does not spread or support fire

Packaging: 15 litre plastic bag
