# EDGE

Extra low shrinkage hand filler for plasterboard joints and corner beads. Saves time and money.

## Now it's easier and more fun to apply filler to joints and corners

Dalapro Edge is a light grey, ready-mixed hand filler with extra high filling capacity and adhesive effect. Edge works equally well on both plaster and concrete.

The unique filling properties enable you to save one layer of application on plasterboard joints. The product also has minimal sinking over time. What's not to like?

Dalapro Edge is Nordic Ecolabelled and has both M1 classification and an Environmental Product Declaration (EPD). It is approved for paper tape and suitable on corner reinforcements such as Habito, AquaBead and Levelline.

### Patent pending

The technology behind the high filling capacity of Dalapro Edge is both innovative and unique. We have applied for a patent and the process is under way. It is protected until further notice by Patent Pending: EP 3943466A1.
