HYDRO

Ready-mixed hand filler for use in wet rooms.

Blue tinted hand filler for wetrooms.

Provides a hard and water repellent surface.

Suitable for use in areas that requires a hard and durable surface.

On plasterboard and concrete.

Approved for embedding papertape.

For new construction and renovation.

DALAPRO® HYDRO

Ready-mixed hand filler for use in wet rooms.

PRODUCT INFORMATION

Dalapro Hydro is a blue ready-mixed hand filler for use in wetrooms or where an extra durable surface is desired on all common types of indoor wall and ceiling surfaces. A high binder content in the filler gives the product a hard, water repellent surface, and maximum adhesion to the substrate. The product is suitable for joint filling and thin smoothing.

The filler meets the requirements of EN 13963 regarding paper tape and wet room filler. The product fulfills CE marking requirements according to EN 13963 and is manufactured in accordance with ISO 9001 and ISO 14001.

Tools are to be cleaned in water. Large volumes of waste can be deposited as normal refuse at municipal refuse facilities. The plastic in the packaging is recyclable and must therefore be taken to the appropriate recycling point or municipal recycling plant.

INSTRUCTIONS

Apply by hand on clean, dry and firmly attached surfaces at a minimum temperature of +5°C. The filled surface is sanded when it has dried. Use sandpaper with particle size 100-120. Eye protection and a dust mask are recommended when sanding. Dust off before the next treatment. Filled surfaces should be primed before wallpapering.

CONSUMPTION OF MATERIAL

Joint filling on plasterboard = approx. 0.3 l/m.
1 mm thin coat plastering = approx. 1 litre/m².

DRYING TIME

The drying time is dependent on substrate, layer thickness, temperature, air humidity etc.

STORAGE

Protect from frost and direct sunlight. Filler is perishable and therefore labelled with a date of production. Unopened packs can be stored for 12 months. Visit www.dalapro.com for further information.

TECHNICAL DATA

Binder: Latex co-polymer

Solvent: Water

Filler: Microspheres and white dolomite

Particle size: Max 0,2 mm

pH: Approx.9

Colour: Blue

Flammability: Does not spread or support fire

Packaging: 3 and 10 litre plastic buckets
