A grey low shrinkage hand filler.

For walls and ceilings indoors.

For new construction and renovation.

Provides a surfaces ready for painting.

Nordic Ecolabelled.

DALAPRO® MAX

Ecolabelled ready-mixed hand filler with high build.

PRODUCT INFORMATION

Dalapro Max is a grey, ready-mixed, coarse hand filler with a high build on all common types of indoor wall and ceiling surfaces. Dalapro Max is particularly suitable for filling where extra high build is required. The product is suitable for initial filling and thin smoothing in both renovation and new construction.

The product fulfills CE marking requirements according to EN 15824 and is manufactured in accordance with ISO 9001 and ISO 14001.

Tools are to be cleaned in water. Large volumes of waste can be deposited as normal refuse at municipal refuse facilities. The plastic in the packaging is recyclable and must therefore be taken to the appropriate recycling point or municipal recycling plant.

INSTRUCTIONS

Apply by hand on clean, dry and firmly attached surfaces at a minimum temperature of +5°C. The filled surface is sanded when it has dried. Use sandpaper with particle size 100-120. Eye protection and a dust mask are recommended when sanding. Dust off before the next treatment. Filled surfaces should be primed before wallpapering.

MATERIAL CONSUMPTION

For 1 mm thin coat plastering = approx. 1 litre/m².

DRYING TIME

The drying time is dependent on factors such as substrate, layer thickness, temperature and humidity.

STORAGE

Filler has a limited shelf life and is date-marked. Unopened packaging can be kept in a dark place, free from frost, for up to 12 months. Containers that have been opened must be sealed well. Visit dalapro.com for more information.
