

PRODUCT DATA SHEET

Dalapro Fine

- White hand filler for repairing and smoothing
 - For indoor use on walls and ceilings

Dalapro Fine

Ready-mixed fine-grain filler for concrete, renovation etc

PRODUCT INFORMATION

Dalapro Fine is a white, ready-mixed, finegrained hand filler on all common types of indoor wall and ceiling surfaces. The smooth consistency makes the product particularly suitable where extremely smooth surfaces are required in both renovation and new construction.

The product fulfills CE marking requirements according to EN 15824 and is manufactured in accordance with ISO 9001 and ISO 14001.

Tools are to be cleaned in water. Large volumes of waste can be deposited as normal refuse at municipal refuse facilities. The plastic in the packaging is recyclable and must therefore be taken to the appropriate recycling point or municipal recycling plant.

INSTRUCTIONS

Apply by hand on clean, dry and firmly attached surfaces at a minimum temperature of +5°C. The filled surface is sanded when it has dried. Use sandpaper with particle size 100-120. Eye protection and a dust mask are recommended when sanding. Dust off before the next treatment. Filled surfaces should be primed before wallpapering.

DRYING TIME

The drying time is dependent on substrate, layer thickness, temperature, air humidity etc.

STORAGE

Protect from frost and direct sunlight. Filler is perishable and therefore labelled with a date of production. Unopened packs can be stored for 12 months. Visit www.dalapro.com for further information.

TECHNICAL DATA

Binder: Latex co-polymer
Solvent: Water
Filler: Microspheres and white dolomite
Particle size: Max: 0.15 mm
pH: Approx.: 9
Colour: White
Flammability: Does not spread or support fire
Packaging: 10 litre plastic buckets
